🔄 Mohamedmahdy404 🛡 Completed

PROFILE

Passionate full-stack .NET developer with expertise in building scalable web applications using ASP.NET and Angular. Strong foundation in software engineering, memory management, and algorithms, backed by a B.E. degree and ITI intensive training. Eager to contribute to impactful software solutions.

INTERNSHIP

Full-stack .Net Web Development, 4-month Program, Intensive Code Camp (ICC), Intensive Training Program (ITP), Information Technology Institute (ITI), Ministry of Communication and Information Technology (MCIT) Nov 2024 – Mar 2025

EDUCATION

Bachelor of Engineering - BE, Computer and Control Engineering 2018 – 2023

El Shorouk Academy

Grade: Very Good with Honors

Graduation project: Smart Fire Fighting and Rescue System (Grade: Excellent)

Brief: Developed an innovative fire response system integrating computer vision and IoT to enhance firefighting efficiency and safety.

Tools: Thermal Imaging, Computer Vision, IoT, Embedded Systems

TECHNICAL SKILLS

Programming Languages

C, C#, JavaScript

Conceptual Knowledge

OOP, Data Structure, Database, Design Pattern, Clean and Testable Code, SOLID Principles

Backend Technologies

ASP.NET Core, Web API, SignalR, RESTful APIs, ASP.NET MVC, EF Core, SQL Server

Frontend Technologies

Angular, CSS3, HTML5, Bootstrap

Architecture & Patterns

Clean Architecture, N-Tier Design, ABP Framework

PROJECTS

Developed a Store Management System

Facilitates efficient product and order management through CRUD operations. The system enables creation, retrieval, updating, and deletion of products and orders, ensuring smooth inventory and sales tracking.

Tools: Windows Forms, .NET, C#, N-Tier Architecture, Microsoft SQL Server, Excel Integration 🔗

ClayHaven E-commerce Platform

An online shopping platform for handmade clay products. Supports user registration, secure login, role-based access, and product browsing. Integrated with Stripe for secure payments.

Tools: ASP.NET MVC, C#, Entity Framework Core, Stripe API, Microsoft SQL Server, N-Tier Architecture 🔗

Pharmacy E-Commerce Platform

Developed a Pharmacy E-Commerce Platform that enables pharmacy owners to create online shops for selling medicines and beauty products. Implemented a robust search feature supporting partial and fuzzy search to help users find the nearest pharmacy with the required product.

Tools: Angular, ASP.NET Web API, Entity Framework Core, Microsoft SQL Server, N-Tier Architecture 🔗

INTERPERSONAL SKILLS

- Excel at self-learning.
- Develop creative solutions to problems.
- Effectively communicate with co-workers.

PROFESSIONAL EXPERIENCE

.NET Backend Developer (Part-Time) <i>Newulm Medical</i>	Dec 2025 – Present
• Contribute to a healthcare booking platform that connects users with licensed providers to book and manage medical services. • Develop and maintain Azure-based microservices, focusing on service boundaries, API contracts, independent deployments, and reliability patterns typical for large-scale systems. • Work with SQL and NoSQL persistence across services, balancing performance, consistency, and scalability tradeoffs in distributed data workflows. • Implement event-driven communication between services and apply idempotency delivery practices to avoid duplicate processing in distributed workflows.	
Full-Stack .NET Software Engineer <i>New Vision Systems Canada</i>	Mar 2025 – Present Toronto, Canada
• Contributed to the development and maintenance of web applications tailored for security system integration. • Designed and implemented full-stack .NET solutions using ASP.NET Core, Entity Framework, and SQL Server. • Created responsive and user-friendly web interfaces using Angular, HTML5, CSS3.	
Full-Stack .NET Instructor (Part-Time) <i>Information Technology Institute (ITI) – Ministry of Communication and Information Technology (MCIT)</i>	Jul 2025 – Present
• Teaching C# programming, .NET development fundamentals, databases, and frontend technologies (HTML, CSS, JavaScript, Angular) to students. • Designed practical sessions and guided students through hands-on projects using Visual Studio, SQL Server, and modern web development tools. • Focused on reinforcing object-oriented programming concepts, building full-stack applications, and promoting clean, maintainable code practices.	

AWARDS

Winner, International Competition on Smart Innovation Technologies (IC-SIT’2023) Awarded a certificate and a metal shield for outstanding performance in a graduation project competition.	
Funded Graduation Project – ITAC CFPS Competition Received funding from ITiD as part of the prestigious ITAC CFPS competition for an innovative graduation project.
