PROFILE

Full-Stack .NET Software Engineer with hands-on experience building healthcare, logistics, and RFID-enabled web platforms using ASP.NET Core, Angular, and microservices architecture. Skilled in clean architecture, CI/CD workflows, and cloud deployment with Microsoft Azure. Also active as a .NET instructor at ITI, translating engineering fundamentals into practical training.

PROFESSIONAL EXPERIENCE

Software Engineer

Arab International Bank (AIB) 🌐

Mar 2026 – Present
Cairo, Egypt

- Contribute to application development and integration workflows, supporting business and operational data processes across internal systems.
- Designed and implemented ETL pipelines using SSIS (SQL Server Integration Services) to extract, transform, and load data from enterprise databases into structured outputs.
- Wrote complex, optimized, and secure SQL queries to efficiently retrieve and process data from relational databases in a banking environment.

.NET Backend Developer (Part-Time)

Newulm Medical 🌐

Dec 2025 – Apr 2026
Amman, Jordan

- Built backend services for Ulm Care, a healthcare booking platform supporting surgery reservations, lab tests, and home-visit scheduling.
- Contributed to Paxi Go, a ride-hailing and delivery platform, implementing real-time request dispatching and live tracking features.
- Designed and maintained microservices-based backend systems, applying Domain-Driven Design (DDD) principles to define service boundaries and responsibilities.
- Implemented CI/CD pipelines with GitHub Actions and leveraged Microsoft Azure for cloud infrastructure, enabling automated deployment and reliable release workflows.
- Worked with SQL and NoSQL databases and integrated third-party APIs to extend platform capabilities across healthcare and mobility services.

Full-Stack .NET Instructor (Part-Time)

Information Technology Institute (ITI) – Ministry of Communication and Information Technology (MCIT)

Jul 2025 – Present
Cairo, Egypt

- Taught core modules of the Full-Stack .NET diploma, covering C#, Entity Framework, ASP.NET MVC, Web API, database fundamentals, and frontend development with TypeScript and Angular.
- Designed practical sessions and guided students through hands-on projects with a strong focus on object-oriented programming, clean code, and maintainable application design.

Full-Stack .NET Software Engineer

New Vision Systems Canada 🌐

Mar 2025 – Mar 2026
Toronto, Canada

- Contributed to the development and maintenance of web applications for RFID-enabled inventory management and access control system integration.
- Built and enhanced full-stack solutions using ASP.NET Core, ABP Framework, Entity Framework Core, SignalR, and SQL Server.
- Developed responsive front-end interfaces using Angular, ABP Angular libraries, PrimeNG.
- Integrated Apache Kafka to enable event-driven data streaming between RFID backend services and web-facing applications.

TECHNICAL SKILLS

Languages & Frameworks

C/C++, C#, OOP, ASP.NET Core, Web API, ASP.NET MVC, Entity Framework Core, SignalR, TypeScript, JavaScript, Angular, PrimeNG, ABP Framework, HTML, CSS, Bootstrap

Architecture & Patterns

SOLID Principles, Design Patterns, Clean Architecture, N-Tier Design, Microservices, Domain-Driven Design (DDD), RESTful APIs

Cloud & DevOps

Microsoft Azure, CI/CD Pipelines, GitHub Actions, Apache Kafka, Docker

Databases

SQL Server, NoSQL (Redis), SSIS, Database Design & Optimization

Tools & Platforms

Git, GitHub, Visual Studio, Postman, Swagger

PROJECTS

Developed a Store Management System

Built a Windows Forms desktop application for managing products and orders, featuring full CRUD operations, inventory tracking, and Excel report integration.

Tools: Windows Forms,.NET 8, C#, N-Tier Architecture, Microsoft SQL Server, Excel Integration [↗](#)

ClayHaven E-commerce Platform

Developed a full-stack e-commerce platform for handmade clay products with user authentication, role-based access control, product catalog, and Stripe-powered checkout integration

Tools: ASP.NET MVC, C#, Entity Framework Core, Stripe API, Microsoft SQL Server, N-Tier Architecture [↗](#)

Pharmacy E-Commerce Platform

Built a multi-tenant pharmacy marketplace enabling pharmacy owners to create online shops for medicines and beauty products. Implemented partial and fuzzy search to help users locate the nearest pharmacy carrying a required product.

Tools: Angular, ASP.NET Web API, Entity Framework Core, Microsoft SQL Server, JWT, N-Tier Architecture [↗](#)

EDUCATION

Bachelor of Engineering - BE, Computer and Control Engineering

2018 – 2023

El Shorouk Academy

Grade: Very Good with Honors

Graduation project: Smart Fire Fighting and Rescue System (Grade: Excellent)

Developed an innovative fire response system integrating computer vision and IoT to enhance firefighting efficiency and safety.

Tools: Thermal Imaging, Computer Vision, IoT, Embedded Systems

INTERNSHIP

Full-stack .NET Web Development, 4-month Program, Intensive Code Camp (**ICC**), Intensive Training Program (**ITP**), Information Technology Institute (**ITI**), Ministry of Communication and Information Technology (**MCIT**)

Nov 2024 – Mar 2025

INTERPERSONAL SKILLS

- Excel at self-learning.
- Develop creative solutions to problems.
- Effectively communicate with co-workers.

AWARDS

Winner, International Competition on Smart Innovation Technologies (IC-SIT'2023)

Awarded a certificate and a trophy for outstanding performance in a graduation project competition.

Funded Graduation Project – ITAC CFPS Competition

Received funding from ITIDA as part of the prestigious ITAC CFPS competition for an innovative graduation project.

LANGUAGES

Arabic - Native

English - B2
